Summary

B.Tech Computer Science graduate (2026) with hands-on experience in Java, Spring Boot, Spring Security, and PostgreSQL/PostGIS. Completed a 6-month backend development internship and independently designed and deployed a role-based, geospatial civic-issue management platform with JWT authentication and REST APIs. Co-author of a peer-reviewed paper on hybrid recommendation systems. Seeking an entry-level Java / Spring Boot Developer role.

Technical Skills

- **Languages:** Java, SQL, JavaScript
- **Backend:** Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, Hibernate Spatial, JWT, REST APIs
- **Frontend:** React, HTML5, CSS3, Bootstrap
- **Database:** PostgreSQL, PostGIS, MySQL
- **Tools & DevOps:** Git, GitHub, Docker, Docker Compose, Maven, Flyway, Nginx
- **Core Concepts:** OOP, MVC Architecture, RBAC

Projects

Smart Civic Issue Reporting System | [Live](#) | [GitHub](#) *Java 21, Spring Boot, Spring Security, JWT, PostgreSQL, PostGIS, React, Docker*

- Designed and built a full-stack, role-based (Citizen, Field Worker, Admin) civic issue management platform supporting geotagged issue reporting, image evidence, status tracking, and notifications.
- Implemented JWT-based authentication and Spring Security role-based access control, including OTP-based registration/password reset and role-scoped API authorization.
- Engineered a PostGIS geospatial data layer using Hibernate Spatial (`geometry(Point,4326)`) with GiST indexing to support nearby-issue search and location-based duplicate detection.
- Built SLA monitoring, status-history tracking, and audit-logging on a layered Spring Boot/JPA architecture with Flyway-managed schema migrations; integrated a role-aware, read-only Gemini AI assistant.
- Deployed the React/Vite frontend on Vercel and the Spring Boot backend on Render, with Docker Compose support for containerized local development.

Testiva — Online Test Portal | [Live](#) | [GitHub](#)

Java, Spring Boot, MySQL, Bootstrap, REST APIs

- Built a role-based (Admin, Student) examination platform supporting test scheduling, user management, and result processing.
- Designed a modular Spring Boot backend with RESTful architecture and integrated the WhatsApp API for automated notifications.
- Deployed the application on Render, managing production database and environment configuration.

Experience

Software Development Intern — Softpro India Computer Technologies Pvt. Ltd.

Jan 2025 – Jul 2025

Onsite / 6-month industrial training program

- Developed and maintained web application modules using Java, Spring Boot, HTML/CSS/JavaScript, and MySQL.
- Implemented backend business logic and database operations for application features; tested and debugged functionality prior to release.
- Collaborated with the development team using Git-based version control workflows to deliver features to production.

Education

B.Tech in Computer Science and Engineering — Integral University, Lucknow

08/2022 – 05/2026

CGPA: 7.5 / 10.0

Research Publication

Design and Implementation of a Hybrid E-Commerce Recommendation Engine Using Matrix Factorization and Semantic Content Analysis, IJIRCST, Vol. 14, Issue 2, pp. 27–33, 2026. DOI: 10.55524/ijircst.2026.14.2.4.

- Co-authored (5 contributing authors) a hybrid recommendation engine combining ALS-based collaborative filtering with TF-IDF/SVD content similarity, served through a REST inference service.

Certifications

- Java Programming — CodSoft Virtual Internship, Certificate ID: 861246a (Jul 2024)
